

3 June 2025

ADAPT & uncover better ways to deliver valuable software products.

Keynote - Birgitta Böckeler (Thoughtworks)

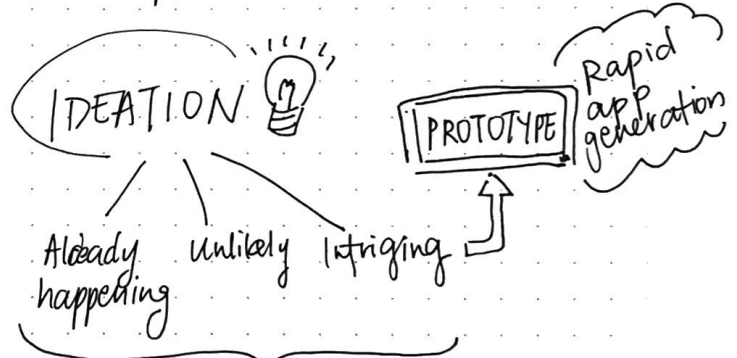

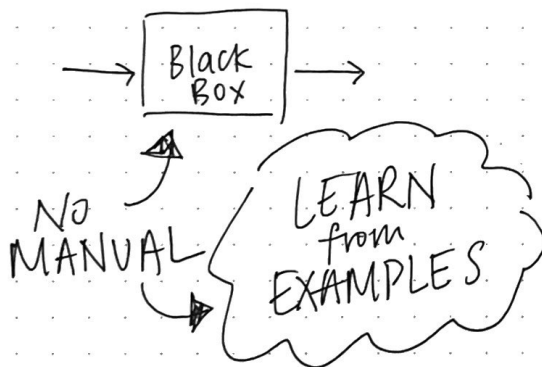

Measuring
How do we do it TODAY?
Adding AI as tool does not change measurement

AI for teams: State of play for AI assistance beyond code.

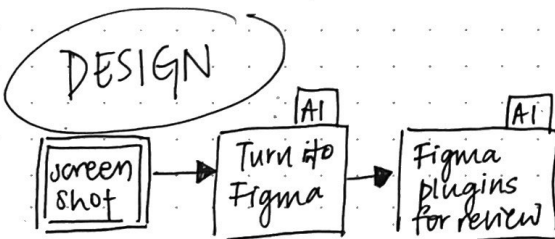

- Cycle Time
- Lead Time

very optimistic
SPEED? ~13%
estimate 2024
potential time saved in cycle time
usually 5-10%
2025 might be FASTER

PRE-FILTER before discussion!  slower

Synthetic Users
Baseline to start
especially for common types

★ Faster DOMAIN context
~ prototypes don't replace high fidelity

SPECIFICATION 

! Hard to do VERTICAL slicing

★ Great starting point for common domain

! Too BROAD to quickly

Try! playing team mates' roles

Get AI to relook & reflect
OO

collaborative
TEAM
sport

Software Delivery

- Translation
- Finding knowledge
- Brainstorming & Ideation
- Summarisation

- x Non-deterministic
- x "Think" in tokens
- x superficial plausibility

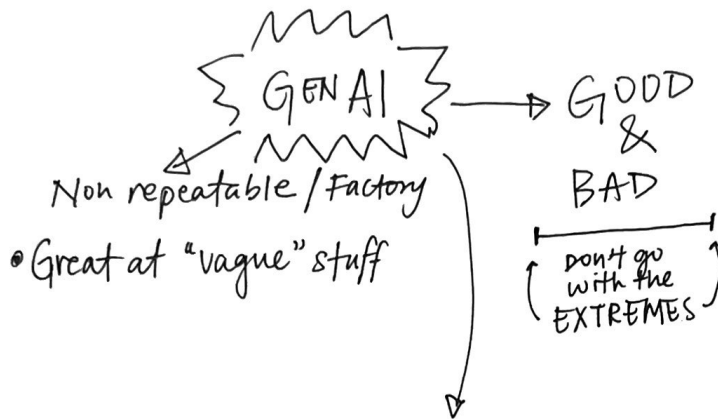

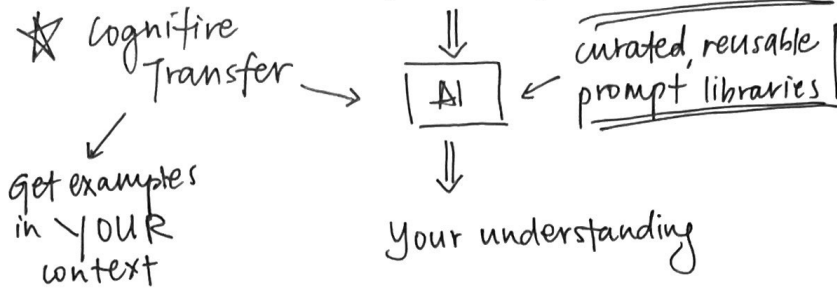

Annie Vella

- SDLC strikes back
Adapting to AI-driven dev.

Integrity check

[Is what you think
REALLY
what you think?]

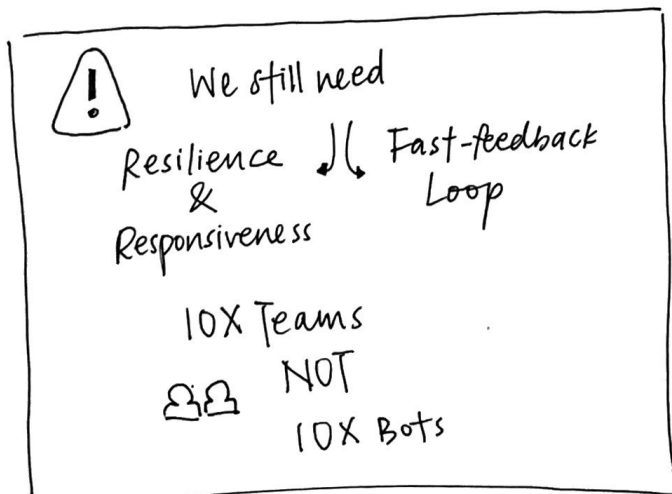

Methodologies

BLESSING — more options earlier
or

CURSE — more not always better

more upfront design? } LURE of waterfall } human quality control shifted — right →

4th Jun 2025

Keynote - Dargja Šmite

unibz

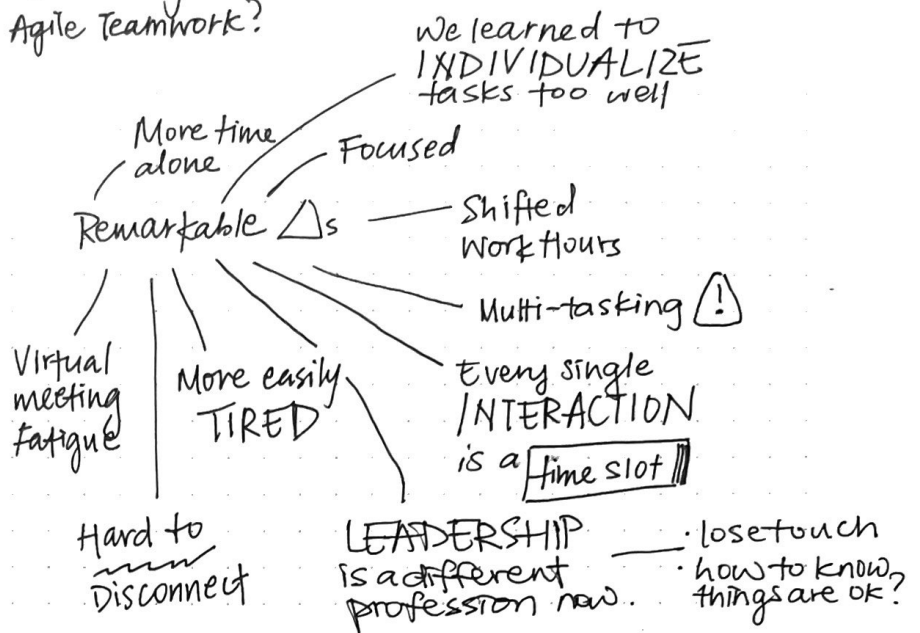

5 years into remote and hybrid working
Has anyone wondered about Agile Teamwork?

“ WE before EGO “

So what?

Over 50%

worked longer than 8 hours on WFH days

What do TEAMS mean today?

2-5 years of tenure is the largest proportion of people

Majority of companies 3 in-office work days

Interestingly INTROVERTS tend to prefer going back to office; to form close knit relationship

office $\neq$ Team presence

Usually junior staff onsite everyday

BUT seniors work FH or on demand

Office Presence PARADOX

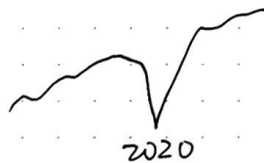

The more we stay at home, the more we are disturbed in office

Remote

second class citizen

people DON'T KNOW each other anymore

compromise AGILE principles!

The GREAT Resignation

Do POLICIES work?

(Not all follow
the mandated
policy

Remote Work Paradox

- RW improves well-being (in ST)
but erodes in long run
- RW increases productivity
but organizations don't get work done
- RW increases job satisfaction 😊
but also attrition

RECOMMENDATIONS

- ✓ Have more COLLABORATIVE tasks
- ✓ Align with team composition
& team needs

cultivate Team

Heidi J. Musser

Modern Business Demands
Modern Ways of working

AGE OF
AI
is here!

#BEGINS
with
PEOPLE

unibz

Peter F. Drucker
The Practice of
Management

HUMAN INTERACTIONS
with others and
AI AGENTS

We are in
A
WORLD
OF CHANGE

People
are the
core of
MODERN BUSINESS

PEOPLE MATTER
MORE THAN
EVER

Leaders are not
steering fast enough
COURAGEOUS

DESIGN 4
INNOVATION

TRY IT
&
TAKE CHANCES

- Grace Hopper

Enable
ORDINARY
human beings
to do
EXTRAORDINARY
things!

Lesson #1
PEOPLE are more
important than
TECHNOLOGY

people are the
ones that make
change difficult

Defending the past
is easier than
abandoning it.

Need for
FEEDBACK
LOOPS

we learn
basis for
EMPOWERMENT

Collaboration is
really hard in an
environment that
focus on
HEROICS.

Demonstrate
how it improves
HUMAN!

ALIGNMENT AUTONOMY
should be I balanced
for AGILE.

WHY!
NOT WHAT

→ understand
listen

THINK BIG!

→ outside our
comfort zone

IMAGINATION
requires
COURAGE.

Are you willing to
◆ ASK FOR HELP?

humility

◆ MAKE MISTAKES?
Teach people
how to learn

◆ BE COMPASSIONATE?

✓ Meet people at
where they are

✓ Do the simplest
things that work

✓ If it doesn't add value,
stop doing it!

✓ Implement 'just enough'
hierarchy

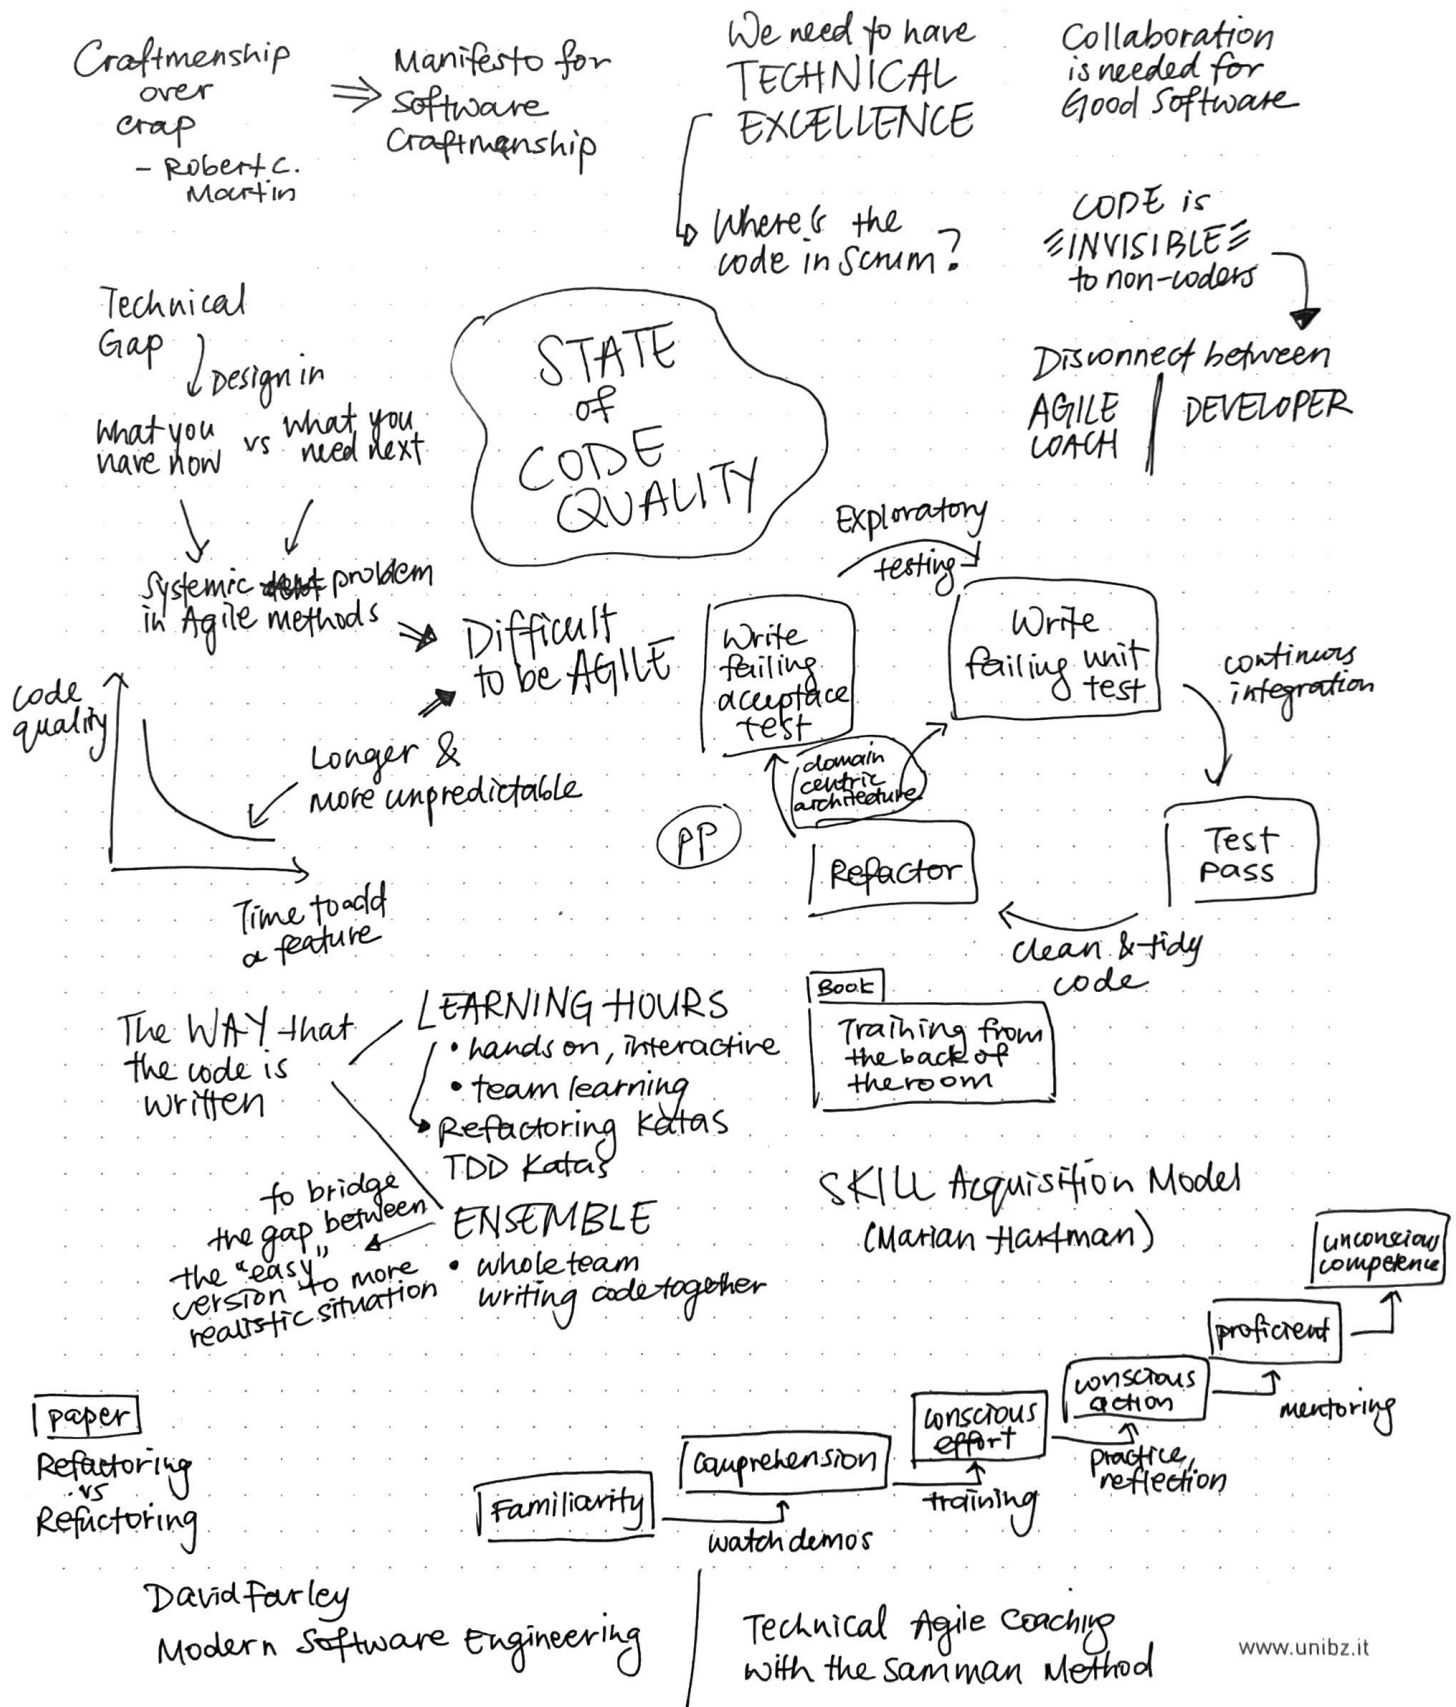

✓ Relentlessly
harmonize
